

Empathy map canvas

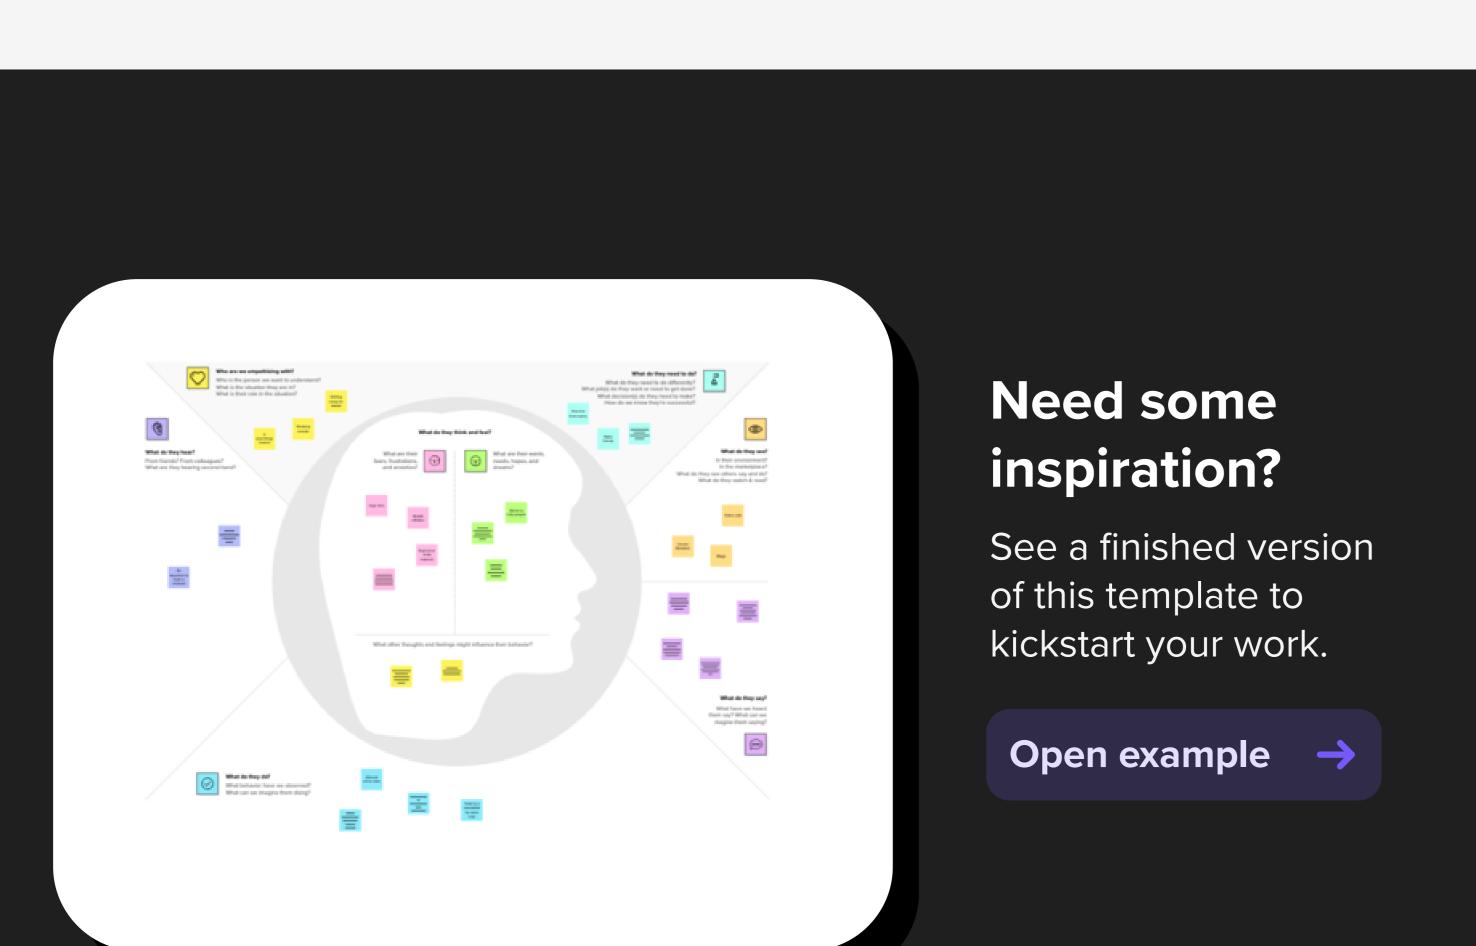

Use this framework to empathize with a customer, user, or any person who is affected by a team's work.

Document and discuss your observations and note your assumptions to gain more empathy for the people you serve.

Network Anomaly Tool using Al

Network Anomaly Detection, using Artificial Intelligence (AI), is a critical component of modern cybersecurity. This tool aims to proactively identify abnormal patterns and behaviors within a network, signaling potential security threats, performance issues, or operational irregularities.
